

APC's Advanced Ultrasonic Generator offers a full range of features to meet any precision cleaning requirements. These generators's will deliver precise cleaning quickly, consistently, and cost effectively.

Features:

- * Bright digital display
- * Status indicators on safety and fault alarms
- * Protection from short-circuit and overload
- * User-adjustable power controls
- * Compact size aluminum cabinet

APCI GEN-1003 Ultrasonic Generator

Input Voltage	120V, or 220V 50/60 Hz
Output Power	300 Watts
Output Frequency	28, 40, 68, 80, 120, or 140KHz
Dimensions (WxDxH)	210 x 390 x140 mm
Weight	6 kgs

APCI GEN-1006 Ultrasonic Generator

Input Voltage	220V, or 240V 50/60 Hz
Output Power	600, 900, 1200 Watts
Output Frequency	28, 40, 68, 80, 120, or 140KHz
Dimensions (WxDxH)	210 x 360 x190 mm
Weight	10 kgs

When requesting a quote or placing an order:

- * Specify the model number
 - * Specify an output frequency
 - * Specify an output power
 - * Specify an input voltage
 - * Keep in mind that Ultrasonic generators are set up for 6 transducers per 300 Watts of power thus:
 - 300W generator requires 6 sandwich transducers
 - 600W generator requires 12 sandwich transducers
 - 900W generator requires 18 sandwich transducers
 - 1200W generator requires 24 sandwich transducers
- (example: APCI Gen-1006 Ultrasonic Generator, 28 KHz, 300W, 220V)
